Finer Timber Doors

ABOUT FINER TIMBER DOORS

Finer Timber Doors is an Australian family business, which has been manufacturing quality cabinet doors and bench tops for the kitchen industry since 1994. Through unique craftsmanship, we produce quality specialty joinery, providing flexibility for personal taste and front doors that can create the ultimate first impression. With experienced staff and state-of-the-art machinery, we endeavour to manufacture and complete our products with exceptional standard and lasting quality. We strive to provide lasting value through our high standards in production and provide the care and detail to meet your requirements. At Finer Timber Doors, we do our best to always provide a courteous and prompt service.

“We aim to provide innovative, unique and stylish doors...”

FINER TIMBER DOORS GUARANTEE

Finer Timber Doors is an all Australian manufacturer, producing all our products on site. The company guarantees its cabinet doors against defects by design, workmanship and/or the use of faulty raw materials (fair wear and tear excluded).

Colour and grain variations occur naturally in timber and are not considered a defect. All timbers are colour matched by hand to achieve a consistent result. Structural failure due to excessive alteration or abuse is not covered by warranty. The guarantee

does not extend in any way to workmanship or damage that has occurred during the handling and delivery.

All doors and tops are checked before leaving our premises. Finer Timber Doors agrees to repair or replace at its discretion, unfinished doors found to be defective within the meaning of this warranty and is limited to the purchase price of the originally supplied doors.

BENCHTOPS

Our solid timber benchtops provide a warm feel, while creating an elegant finish. We supply benchtops in a range of timbers suitable for all areas, including kitchens, bathrooms, offices and laundries. All our tops are made at our premises and made to order.

We offer a range of thickness (20mm, 32mm, 38mm & build-ups) and lamination sizes. Standard and recommended lamination size on most timbers is 90mm. A range of different Edge Profiles are available for our benchtops, please enquire within.

32mm thick (small pencil round top & bottom edges)

32mm thick (small pencil round top & bottom edges)

38-40mm thick (square edges)

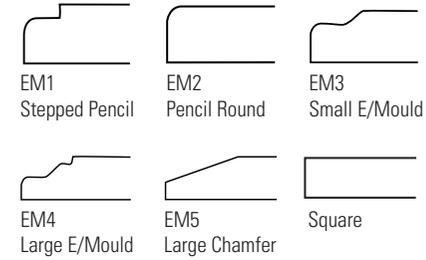

Edge Profile Choices:

MOULDINGS

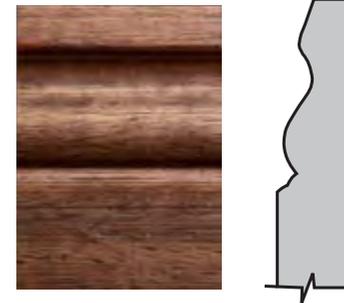

Edge Mouldings

A choice of edge moulding to the outside of your doors. Not specified, doors will be finished with square edges.

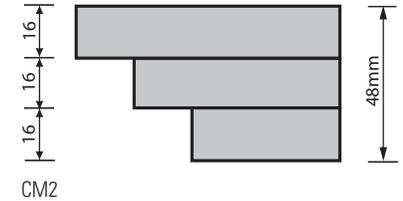

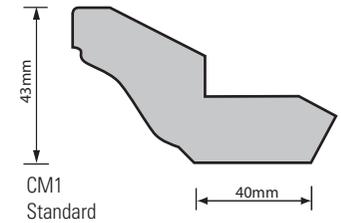

Skirting Mouldings

A decorative skirting to finish the room with style. The height is variable.

Cap Mouldings

Two decorative capping mouldings are available.

Bolection Mouldings

Standard in doors FTD 8, FTD 5 and FTD 11 is 22mm. Also available on request is the 32mm Tudor Mould.

The timber doors shown are an indication only and do not mean you will receive the exact colour, as timber variation is very common.
